What can you do with unwanted Mercury and Medications?

Take unwanted medications and mercury containing products to your local household hazardous waste collection program for proper disposal. Call the *Indiana Household Hazardous Waste Task Force, Inc.* at **(812)349-2867** or visit **www.IndianaHHW.org** for collection programs in your area. If your community or solid waste management district does not collect medications or mercury, visit **www.recycle.IN.gov/5685.htm** for information.

When you dispose of medications and mercury containing products improperly - such as dumping them down the drain, they can contaminate the water and are difficult for treatment systems to remove. Improper disposal leads to contamination of the water you drink.

Do your part and remember...

***Use your brain before pouring
anything down the drain!***
